

Science Curriculum Intent

At Shirley Warren Primary and Nursery School, we believe the children should receive a high-quality Science education which provides the foundations for understanding the world through specific disciplines of biology, chemistry and physics. Through building up a body of key foundational knowledge and concepts, pupils will be encouraged to recognise the power of rational explanation and develop a sense of excitement and curiosity about natural phenomena. Our children will be taught to understand how Science can be used to explain what is occurring, predict how things will behave and analyse causes.
